compact and mid-sized walk-behind concrete floor grinders and polishers usually fit through a standard 30-inch or 36-inch household door, as many units measure between 20 to 26 inches wide. However, large commercial ride-on or heavy multi-head planetary machines are too wide and require wider double doors or removal. Bartell Global +4

Door and Equipment Sizes

- **Standard Interior Door:** Usually 24 to 30 inches wide.
- **Standard Exterior Door:** Usually 36 inches wide.
- **Small/Edge Grinders (8" to 10"):** Widths are roughly 10 to 15 inches easily passing through any door.
- **Medium Walk-Behind Polishers (20" to 26"):** Widths range from 21 to 26 inches, clearing standard interior and exterior frames.
- **Large/Ride-On Polishers (30"+):** Widths exceed 30 to 40+ inches, meaning they will not fit standard residential entryways without disassembly or alternative access. Polished Concrete Soluti... +4

Tips for Moving Equipment Indoors

- **Measure twice:** Check the narrowest doorway, hallway turn, or basement stair entry on your specific path. Arams... +1
- **Remove handles or weights:** Many walk-behind units allow you to take off extra weight plates or fold down the handlebars to reduce width and height.
- **Check power needs:** Ensure the residential space has proper 120V or 220V single-phase power hookups that a portable residential-friendly machine requires. Xtreme Polishing Systems +1
